

MLS SYSTEMS DIVISION

EMPOWERING

THE

FUTURE

OF MLS

Who is Fidelity National Information Solutions (FNIS) - MLS Systems Division?

Our Emphasis Is On You

Serving one out of every two REALTORS® in North America for nearly five decades, the MLS Systems Division has focused solely on providing technology solutions to the real estate industry. We understand your business because it's our only business. We invest our resources into creating the highest level of product and service quality to make you more efficient, productive and profitable.

Big Or Small, We Have What You Need

Whether you're a large or small MLS, or a professional starting out in the business, the MLS Systems Division is redefining how you do business at an affordable price. The ever-expanding list of customers who place their confidence in us makes our success in that endeavor convincingly evident.

We Want To Be A Part Of Your Team...

Our support center is always there for you, by phone, fax or e-mail. We track every call to our support center with our state-of-the-art Intranet system. Our issues database resolves your concerns within three minutes and 90% of the calls require only one contact.

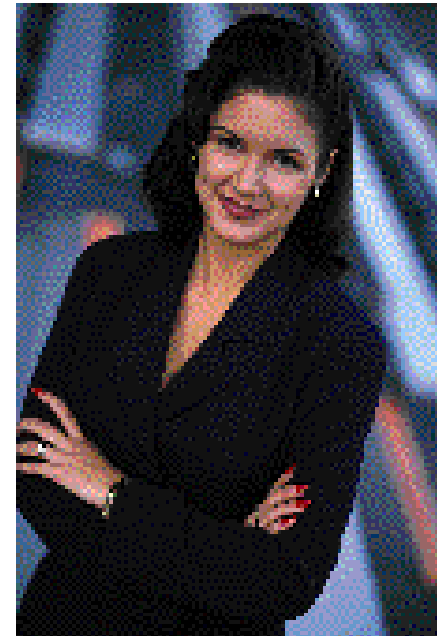

...And We'll Make You A Part Of Ours

We encourage our customers to participate in user groups and industry councils. Your input to our systems and services are invaluable. Visit our web site at www.fnismls.com and sign up to become a member of our user groups.

What does the MLS Systems Division offer?

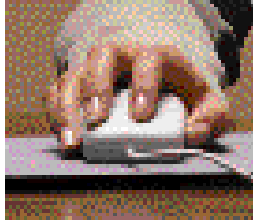

More Than An MLS System

Paragon™ is an online MLS for real estate professionals. It includes "best in industry" functionality and so much more! Based on an open and stable architecture for customer configurations and fast system installations, Paragon sets the stage for freedom of choice. Choose to manage customer contact information, communicate electronically more often, provide listing data using virtual tours and mapping capabilities, customize brochures, CMAs and statistical reports and keep track of all your billing needs.

Want more?

What about interfacing with the country's most comprehensive public records database, broker reciprocity compliance options, and a gateway to the widest array of products and services from FNIS. These include your choice of title, tax, flood and appraisal services, transaction services, lead generation and a broker referral network. No other industry participant can claim to offer all these and at the choice of the real estate professional.

Our distributed database system, Paragon Offline is all you need when you take your work with you. On your desktop or laptop you can perform all your searches, prospecting, marketing presentations and financial functions at your convenience. Schedule your database download when you want and take your MLS with you. If you work with a Palm™ try our Pocket Real Estate™ interface. MLS listings data is always available to help you respond to your customers quickly.

Customer Service

Whether you take advantage of our toll-free and e-mail based technical support, software updates and training documents on our web site, or a variety of training options, we want our customers to get the most for their purchase. And, where can you contact individuals responsible for each customer service area by calling them directly or e-mailing your valuable suggestions? Refer to our web site for contact information and let us know how we can help you.

Book Publishing

Create high-quality, low-cost MLS books. This can be a stand-alone module enabling your board to capture pictures locally and publish camera-ready, original artwork.

Why FNIS - MLS Systems Division?

The MLS Systems Division is the driving force behind the new era in *complete* business management solutions for the real estate professional. While others merely vend parts of a solution, we *define* Internet-based MLS technology, premier customer care and packaged services designed to expedite the real estate transaction.

Customer Focused:

From employee empowerment to best serve our customers to timely system installations to customer feedback, the MLS Systems Division is dedicated to serving the needs of our customers.

Information Integration: As part of FNIS, the MLS Systems Division offers services tailored to customer needs and distributed on-demand. As the portal to these services, our market-focused product approach is backed by an innovative technological architecture as evident in our Internet-based systems.

Reliable Systems: As an integral component of a financially sound organization serving the real estate industry for nearly 50 years, we deliver systems as promised.
